PATENT ASSIGNMENT

IcePyre Semiconductor Corporation, c/o Fraser Milner Casgrain LLP, 99 Bank Street, Suite 1420, Ottawa, Ontario, K1P 1H4

(hereinafter "Assignor")

IceFyre Semiconductor, Inc., c/o Fraser Milner Casgrain LLP, 99 Bank Street, Suite 1420, Ottawa, Ontario, K1P 1H4

(hereinafter "Assignee")

WHEREAS the Assignor and Assignee executed the Intellectual Property Transfer Agreement dated October <a>S/, 2005, which provides for the purchase by Assignee of certain patent rights of Assignor; and

WHEREAS the Assignor, in consideration of CAD one dollar (\$1.00) and other good and valuable consideration, the receipt of which is hereby acknowledged, do hereby sell, assign and transfer to the Assignee and its successors and assigns:

- (i) Assignor's entire right, title and interest in Canada, the United States and throughout the world in and out to the patents and patent applications listed in Schedule A attached hereto, including any and all inventions described therein, and in any and all continuations-in-part, continuations, divisions, substitutes, reissues, re-examinations, or extensions thereof, and all other applications for patent relating thereto which have been filed, or hereafter shall be filed, in Canada, the United States or in any other jurisdiction and further including all rights under treaties to file and prosecute patent applications corresponding to the preceding patents and patent applications (the "Patents");
- (ii) all of Assignor's corresponding right, title and interest in and to any patents which may issue therefore, the same to be held and enjoyed by Assignee to the full end of the term for which the said patent is granted and maintained, as fully and entirely as the same could have been held and enjoyed by Assignor, and;
- (iii) the right to take action and recover in respect of any infringement of the Patents that took place prior to the date of this Assignment.

The Assignor hereby authorizes the issuance of any and all registrations for the Patents to the Assignee, its successors, assigns or legal representatives.

The Assignor hereby irrevocably designates and appoints the Assignee and its duly authorized officers and agents as the Assignor's agent and attorney in fact, to act for and on the Assignor's behalf and stead, to do all such lawful acts and things and to execute such further lawful assignments, documents, assurances, applications and other instruments as reasonably may be required by the Assignee, its successors, assigns or legal representatives, to obtain any and all

patents or patent applications to which any of the foregoing claim priority, and (c) current or future rights to (i) provisional patent any provisional patent application, patent application or patent listed below and all other rights arising out of such inventions and Delaware limited liability company, having an office at 2711 Centerville Road, Suite 400, Wilmington, New Castle Country, DE categories (a), (b), (c) and (d), including, without limitation, under the Paris Convention for the Protection of Industrial Property, protection, design patent protection, and other governmental grants; (d) the rights to all inventions and discoveries described in applications, patent applications, and patents of any kind relating to any inventions and discoveries described in any provisional discoveries; (e) rights to apply in any or all countries of the world for patents, certificates of invention, utility models, industrial (whether currently pending, filed, or otherwise) and other enforcement rights, including, without limitation, all rights under the provisional patent applications, patent applications and patents listed below and/or under or on account of any of the foregoing he International Patent Cooperation Treaty, or any other convention, treaty, agreement or understanding; (f) causes of action .9808 ("Assignee"), or its designees, all right, title and interest that exist today and may exist in the future in and to all of the For good and valuable consideration, the receipt of which is hereby acknowledged, IceFyre Semiconductor, Inc., following (the "Patent Rights"): (a) the provisional patent applications, patent applications and patents listed below, (b) all counterparts to any of the foregoing, including, without limitation, certificates of invention, utility models, industrial design continuations in part, continuing prosecution applications, and divisions of such patents and applications; and (iii) foreign Delaware Corporation, ("Assignor"), does hereby sell, assign, transfer and convey unto Zarbaña Digital Fund LLC, a design protections, design patent protections or other governmental grants of any type related to the my of the foregoing patent applications, patent applications and patents listed below; (ii) reissues, reexaminations, extensions, continuations, categories (b), (c) and/or (d) to

- damages,
- njunctive relief and œŒ
- other remedies of any kind

for past, current and future infringement; and

(g) all rights to collect royalties and other payments under or on account of any of the foregoing

Assignor represents, warrants and covenants (except that Purchaser makes no representation, warranty or covenant with respect to the entries in the above chart that are Australian patent applications with Item designations ending in "AU**") that:

- Assignor has the full power and authority, and has obtained all third party consents, approvals and/or other authorizations required, to enter into this Agreement, make the assignments, and to carry out its obligations under this Assignment of Patent Rights;
- or other encumbrances, and restrictions. There are no actions, suits, investigations, claims or proceedings threatened, pending or regulations in each respective jurisdiction. The Patent Rights are free and clear of all liens, claims, mortgages, security interests assignments for the Patent Rights as necessary to fully perfect its rights and title therein in accordance with governing law and Assignor owns all right, title, and interest to the Patent Rights, including, without limitation, all right, title, and in progress relating in any way to the Patent Rights. There are no existing contracts, agreements, options, commitments, interest to sue for infringement of the Patent Rights. Assignor has obtained and properly recorded previously executed proposals, bids, offers, or rights with, to, or in any person to acquire any of the Patent Rights.

patents, certificates of invention, utility models or other governmental grants that may be granted upon any of the Patents Rights Assignor hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all in the name of Assignee, as the assignee to the entire interest therein.

assignments, oaths, declarations and other documents on a country-by-country basis, to assist Assignee in obtaining, perfecting, proceedings, opposition proceedings, cancellation proceedings, public use proceedings, infringement or other court actions and things necessary, proper, or advisable, including without limitation the execution, acknowledgment and recordation of specific Assignor shall, at the reasonable request of Assignee and without demanding any further consideration therefor, do all the like with respect to the Patent Rights. With prior written approval by Assignee, Assignee will pay Assignor's reasonable inventors, prompt production of pertinent facts and documents, giving of testimony, execution of petitions, oaths, powers of attomey, specifications, declarations or other papers and other assistance reasonably necessary for filing patent applications, sustaining, and/or enforcing the Patent Rights. Such assistance shall include providing, and obtaining from the respective complying with any duty of disclosure, and conducting prosecution, reexamination, reissue, interference or other priority costs and expenses.

assigns and other legal representatives, and shall be binding upon Assignor, its successor, assigns and other legal representatives. The terms and conditions of this Assignment of Patent Rights shall inure to the benefit of Assignee, its successors,
